

MEDICARE BENEFICIARIES:

Have your out-of-pocket expenses **increased** for your medical equipment items?

Have you experienced **delays** in getting equipment & related services?

Have you had **difficulty finding** a medical equipment supplier to service you?

IF SO, YOU HAVE BEEN IMPACTED BY Medicare's funding cuts to home medical equipment & must take action!

On July 1, 2016, Medicare slashed reimbursement rates for medical equipment across rural America by upwards of 50-80%. As result, trusted homecare providers have been forced to make difficult decisions to keep their doors open, such as **change their delivery/service policies, reduce their product offerings & require beneficiaries to pay up-front for their medical equipment**, in which Medicare will only partially reimburse. Medicare changes are causing patients to lose access to vital medical equipment they need to be in their home!
